Nex-Gen Lumina — Dealer Dashboard Guide

The Dealer Dashboard is your business at a glance — every live job, every installer's workload, every referral reward that's pending, in one place. It's how you keep follow-ups tight, installers utilized, and referral payouts flowing. Permanent residential and commercial lighting that works as hard as you do, and your dashboard makes sure the money side of that works just as hard.

What you'll need

- The Lumina app on your phone or tablet
- Your dealer **Sales PIN** or your personal **Installer PIN** (your 4-digit dealer + installer code)
- A few minutes at the start of the day to scan the Overview and Pipeline tabs

---

1. What the dashboard gives you

Your time compounds when you see the whole business at once. The dashboard lets you:

- **Track sales jobs** from first prospect visit through completed installation
- **Monitor your installers** — who's active, who's booked, who's closing jobs
- **Manage referral rewards** — which referrals converted, what tier your top ambassadors are in
- **See payout status** — pending, approved, fulfilled

Everything updates live, so when an installer marks a job "Install Complete" out in the field, you see it within seconds — no refresh needed, no waiting on a nightly export.

---

2. Getting in

You can enter the dashboard from any active staff session.

From a sales session

1. Open Lumina
2. Tap the **Lumina logo** 5 times on the login screen to open the Staff PIN screen
3. Enter your **Sales PIN**
4. Tap **Dealer Dashboard**

From an installer session

1. Open Lumina
2. Open the Staff PIN screen the same way (5 taps on the Lumina logo)
3. Enter your **4-digit installer PIN** (dealer code + installer code)
4. Tap **Dealer Dashboard** from the session menu

From Nex-Gen admin access

Nex-Gen LED LLC admins can view any dealer's dashboard:

1. Enter Installer Mode → **Admin Access** → enter the admin PIN
2. Open **Manage Dealers** → tap a dealer
3. The dashboard opens in **Admin view** (amber label confirms)

> **Tip:** Your dealer code badge (e.g., "Dealer 03") sits in the top-right corner at all times, so you always know which dealership you're looking at.

---

3. The four tabs

Tab	What it's for
Overview	Your morning snapshot — stats, pipeline summary, recent activity
Pipeline	Every sales job grouped by status — your full funnel

Team	Your installers with activity and install counts
Payouts	Referral rewards — pending, approved, fulfilled

---

4. Overview tab

This is the tab that earns its keep first thing in the morning. It loads by default when you open the dashboard.

Stat cards

Four metric cards sit at the top:

Card	What it shows
Active Jobs	Jobs not yet at "Install Complete"
Completed	Total installations your dealership has closed
Installers	How many installers you have on the roster
Pending Payouts	Referral rewards waiting on Nex-Gen LED LLC approval

Pipeline status bar

Below the stats, a horizontal bar chart shows how your jobs are distributed across the pipeline stages. A heavy cluster in **Estimate Sent** tells you exactly where your follow-up time should go today — that's where money is sitting still.

Recent activity feed

The bottom of the tab is a chronological feed of your last 15 business events:

- New jobs created
- Estimates sent and signed
- Pre-wire completions

- Installations completed
- Payout requests and approvals

Each entry shows a timestamp ("2h ago", "yesterday", "3d ago") plus the job number and dollar value — so you can skim and spot what's moving and what isn't.

> **Tip:** Tap **View all** at the bottom of the feed to jump straight to the Pipeline tab with the full job list.

---

5. Pipeline tab — your sales jobs

Every sales job under your dealership, ordered most-recently-updated first. Each row shows:

- **Customer name** and address
- **Job number** (e.g., `NXG-0847`)
- **Current status** with a color-coded badge
- **Total price** of the installation
- **Progress bar** showing how deep into the pipeline the job has advanced

Sales job statuses

Status	What it means	Progress
Draft	Job created, prospect info entered	10%
Estimate Sent	PDF estimate generated and delivered	30%
Estimate Signed	Customer has signed	50%
Pre-Wire Scheduled	Day 1 appointment is booked	65%
Pre-Wire Complete	Day 1 done — conduit, wiring, mounting	80%
Install Complete	Day 2 done — system live, customer handed off	100%

The full lifecycle

```
Prospect Visit → Zone Survey → Estimate Generated → Customer Signs
  → Pre-Wire Scheduled → Pre-Wire Complete → Installation Complete
```

Each stage carries the date it happened and the salesperson or installer responsible — so you always know whose touch was last on a job.

Job detail

Tap any job to see:

- Prospect contact info — name, email, phone, address
- Installation zones — product type, run lengths, pricing
- Power mount and injection point details
- Photos captured during the site visit
- Salesperson notes
- Estimate and signature history

> **Tip:** Any job sitting in **Estimate Sent** for more than a week is at risk. The longer an unsigned estimate sits, the less likely it converts — that's where a phone call earns its highest return on time.

---

6. Team tab — your installers

Every installer registered under your dealership, at a glance.

What you see for each installer

Field	What it shows
Name	Installer's full name
PIN	Their 4-digit PIN (dealer code + installer code)
Status	Active or inactive
Installations	Total completed customer setups

What you can do here

- **View an installer's full profile** — tap their row
- **Coordinate assignments** — see who's booked, who's available
- **Monitor performance** — install counts by installer side-by-side

> **Heads-up:** Only Nex-Gen LED LLC administrators can add, deactivate, or edit installers. To onboard a new tech or deactivate someone who's left, contact your Nex-Gen admin.

PIN format refresher

Every installer PIN is built from your dealer code:

`[Dealer Code — 2 digits] + [Installer Code — 2 digits]`

Example: Dealer code `03` + installer code `05` = PIN **0305**.

---

7. Payouts tab — your referral rewards

Everything payout-related for jobs under your dealership.

Payout statuses

Status	What it means
Pending	Installation complete, reward calculated, waiting on Nex-Gen admin approval
Approved	Nex-Gen admin reviewed and approved
Fulfilled	Gift card or credit has been issued to the referrer
GC Cap Reached	Referrer hit their annual Visa gift card limit — credit was issued instead

Payout details

Each entry shows:

- **Prospect name** — whose install triggered the reward
- **Job number** — links back to the sales job
- **Install value** — total installation dollars
- **Reward amount** — based on the reward tier
- **Reward type** — Visa Gift Card or Nex-Gen Credit
- **Date created** and **date approved** (if applicable)

The payout lifecycle

1. A referred customer's installation reaches **Install Complete**
2. The system calculates the reward from install value and referral tier
3. A payout record is created with **Pending** status
4. A Nex-Gen admin reviews and approves
5. The reward is issued — gift card or credit — and marked **Fulfilled**

---

8. Referral rewards — how the program pays

The referral program rewards customers and dealers for bringing in new business. Understanding the mechanics helps you promote it and answer customer questions.

How referrals work

1. Every Lumina user gets a unique referral code (format: `LUM-XXXX`)
2. When a prospect mentions a referral code during the sales process, the rep enters it on the prospect information form
3. The system tracks the referral through the full pipeline
4. When the referred customer's installation completes, the referrer earns a reward

Reward tiers

Rewards scale with the total installation value of the referred job.

Installation Value	Visa Gift Card	Nex-Gen Credit

Under $1,500	$50	$100
$1,500 – $2,999	$100	$200
$3,000 – $4,999	$150	$300
$5,000 – $7,499	$200	$400
$7,500+	$250	$500

Reward types

Type	Notes
Visa Gift Card	Physical or digital Visa — capped at **$599 per calendar year** per participant
Nex-Gen Credit	Credit toward future Nex-Gen equipment or installation — **no annual limit**

Annual gift card cap: If year-to-date Visa gift card payouts reach $599, the system automatically switches subsequent rewards to Nex-Gen Credit at the higher credit rate. It happens silently — no action from you or the customer — and the customer actually comes out ahead.

Ambassador tiers

Referrers climb tiers as their cumulative referred installs add up:

Tier	Requirement	Badge
Bronze	0+ installs	Amber
Silver	3+ referred installations	Silver
Gold	8+ referred installations	Gold

Platinum	15+ referred installations	Cyan

Tier status shows on the **Refer & Earn** screen in the customer's settings. A progress bar shows how close they are to the next tier.

> **Tip:** Your most satisfied customers are also your best salespeople. Remind them of their referral code — and the real rewards — at install handoff and in every seasonal touchpoint.

---

9. Understanding your sales data

Where the data lives

The dashboard reads from the Lumina cloud in real time, filtered to your dealer code:

- All sales jobs
- Payout records linked to your jobs
- Your installer roster

Job numbers

Every job gets a unique number (e.g., `NXG-0847`) at creation. That number appears on estimates, in the pipeline, on payout records, and in the activity feed — so use it as the universal reference when talking to your team or Nex-Gen support.

Currency and pricing

All figures are USD. **Total price** on a sales job is the sum of its zone prices. Zone pricing is set during the sales visit, based on product type, run length, and install complexity.

---

10. Best practices — daily rhythm

Every morning

- **Overview tab** for the overnight picture and fresh activity
- **Pipeline tab** for jobs that need a follow-up today
- **Payouts tab** to stay aware of pending rewards for your top referrers

Pipeline management

- Follow up on **Estimate Sent** within 3–5 days
- Lock in the pre-wire date immediately after signing
- Make sure installers update status after each milestone (pre-wire complete, install complete) — not batched end-of-week

Team coordination

- Review installer workload before assigning new jobs
- Keep installer contact info current; notify Nex-Gen admin of any changes
- When an installer leaves, request deactivation immediately — their PIN stays live until Nex-Gen deactivates it

Referral promotion

- Share the referral program at every install handoff — not as a throwaway, but as a one-liner like "You'll earn $200 when a neighbor signs up"
- Point customers to **Settings** → **Refer & Earn** in the app
- Flag your Gold and Platinum ambassadors — they're your top referral engine; a quick thank-you goes a long way

---

11. Quick reference

Action	Where
View business overview	Dashboard → **Overview**
See all sales jobs	Dashboard → **Pipeline**
Check installer roster	Dashboard → **Team**

View referral payouts	Dashboard → **Payouts**
View job details	Tap any job in the Pipeline list
See recent activity	Overview → Recent Activity feed
Check pending payouts count	Overview → **Pending Payouts** card
Access Refer & Earn (customer-facing)	Settings → **Refer & Earn**

---

12. Frequently asked

Why does the dashboard say "No active dealer session"?

You have to enter through a valid sales or installer session. Sessions time out after 30 minutes of inactivity — re-enter your PIN to start a fresh session.

Can I edit a sales job from the dashboard?

The dashboard is read-only for pipeline data. To update a job's status or details, use the Sales Mode workflow where jobs are created and advanced.

Why was a reward issued as Nex-Gen Credit instead of a gift card?

The referrer hit the **$599 annual Visa gift card cap**. The system automatically switches to Nex-Gen Credit at the higher credit rate — the customer actually comes out ahead.

How do I get a new installer added?

Contact Nex-Gen LED LLC admin with the installer's name, email, and phone. They'll create the installer under your dealer code and give you the new 4-digit PIN.

Can I view another dealer's dashboard?

No. Each session is scoped to your dealer code. Only Nex-Gen LED LLC administrators have cross-dealer visibility.

What success looks like

- You open the dashboard in the morning and know within 60 seconds where your team's time should go
- Your **Estimate Sent** bucket is short — no job sitting more than 5 days without a touch
- Every installer shows recent activity; none are listed as inactive without a reason
- Pending payouts move to **Fulfilled** on a regular cadence, keeping your referrers happy and coming back
- Your Silver / Gold / Platinum ambassador count grows month over month

If something isn't working

"No active dealer session." Your session expired. Re-enter your PIN. Sessions time out after 30 minutes of inactivity.

"Numbers look stale or don't match what my installer just did." The dashboard updates live, but pull to refresh if something looks off. If the install was marked complete within the last minute, give it a moment — the update will appear.

"I can't see a job my rep just created." The job is probably still in **Draft** and filtered out of some views. Check the Pipeline tab with no filter applied, or open Sales Mode → **My Estimates** — it will show up there.

"A payout has been in Pending for a long time." Payouts require Nex-Gen LED LLC admin approval. If one's been sitting for more than a few business days, email payouts@nexgenled.com with the job number.

"I need to add or remove an installer." That's an admin-only action. Contact Nex-Gen admin with the installer's name, email, and phone, or the PIN of the installer to deactivate.

Where to go for support

- **General support:** support@nexgenled.com
- **Payout questions:** payouts@nexgenled.com
- **Technical issues or app bugs:** contact the Nex-Gen admin team
- **Installer management:** contact your Nex-Gen administrator

For the full walkthrough on completing customer installations, see the Dealer & Installer Setup Guide. For admin operations — creating dealers, managing installers, viewing all installations — see the Admin Operations Guide.

Nex-Gen Lumina v2.2 — Dealer Dashboard Guide — April 2026
